

How to Highlight in the Future Scene Displayed in FPSOnline

Once the student(s) have logged in and clicked the “Go To Virtual Booklet” button from the student dashboard. That will take the student(s) into the GIPS booklet to begin working. On the left-hand side of the page there is a menu with several options one of those being “Future Scene”. This is the menu item you click to view the Future Scene.

Next, when viewing the Future Scene there is a toolbar at the top of the viewing window where the Future Scene is displayed. If you click the yellow square from that toolbar, you will then be able to highlight on the Future Scene by clicking and dragging over the text that you want to highlight.
