Following Round 1 evaluations, rank outliers were identified and replaced with a revised total rank for Final Round consideration. (See "Revised Total Rank") Final round determination is based on points, ranks, and internal opinion values to tabulate a scenario score. Scenarios with scenario score of 18 or less advance to final round along with scenarios with 2 ranks of 1.

Final Round scenarios were evaluated by a team of three new evaluators. Final placement is based on the revised total rank the scenario receives. In the event of a tie in the revised total rank, preferential rank is used to break the tie and highlighted.
