In Round 1, packets of 7-9 Scenario Performances were scored by two evaluators. Within the packet, total score for each Performance was used by each evaluator to determine the Performance's rank. Advancement to Round 2 is based on points, ranks, and internal opinion values, which are used to tabulate a Composite Score. Performances with a Composite Score of 16 or less advanced to Round 2. Scenario Performance Round 2 was evaluated by a third evaluator who had not previously scored these Performances. All three evaluations were used to perform a Paired Comparison Analysis to determine final placement for awards.
